Preface

One of the most difficult medical problems of the twenty-first century is still cancer. The complexity and variety of cancer continue to restrict the efficacy of traditional methods, despite notable advancements in molecular biology, pharmacology, and clinical practice. From medication development to patient treatment, the process is drawn out, costly, and prone to failure. Simultaneously, the amount of biological data from imaging to genomics to electronic health records has increased rapidly, far exceeding human processing capabilities. In this context, machine learning (ML) and artificial intelligence (AI) have become revolutionary forces that have the potential to completely reshape the field of cancer, rather than being supplementary tools. This book serves two purposes. Its first goal is to give a thorough but understandable summary of the present applications of AI and ML in cancer treatment and drug development. Secondly, it aims to stimulate contemplation about the future. Readers will acquire a thorough grasp of this quickly developing topic through in-depth research, case studies, and discussion of useful tools and platforms. We also look at the difficulties with clinical integration, ethics, and regulations that arise with using AI in high-stakes healthcare settings. Concerns of bias, openness, patient privacy, and safety are not incidental; rather, they are essential to creating reliable and clinically significant systems.

Researchers, physicians, data scientists, students, healthcare innovators, and policymakers are among the many groups of people this book is meant towards. We hope that this volume will be a source of inspiration and guidance for those who are new to the area or actively involved in determining its future. Human knowledge and machine intelligence will need to work together as cancer therapy moves toward a more data-driven, predictive, and personalized paradigm. In order to provide faster, safer, and more individualized therapies, the ultimate goal is not just to further science but also to enhance lives.

About the Editors

Mohammad Habeeb

Dr. Mohammad Habeeb is an Assistant Professor (Senior Grade) at the Crescent School of Pharmacy, B.S. Abdur Rahman Crescent Institute of Science and Technology (Deemed to be a university) in Chennai, Tamil Nadu. He earned his M.Pharm in Pharmaceutics from Jawaharlal Nehru Technological University Kakinada, Andhra Pradesh and Ph.D. from SRM college of Pharmacy, SRM Institute of Science and Technology kattankulathur. His research interests include drug delivery, nanotechnology, cancer biology, and artificial intelligence. With over 13 years of experience in academia and the pharmaceutical industry, Dr. Habeeb has published numerous articles, books, and book chapters in peer-reviewed international journals. He holds a patent and serves as a reviewer for many international publishers. Additionally, he has guided and continues to guide B. Pharm and M. Pharm students.

Hariharan Thirumalai Vengateswaran

Mr. Hariharan Thirumalai Vengateswaran is currently pursuing his Master's in Pharmaceutics, after graduating as a gold medalist in Bachelor of Pharmacy from B.S. Abdur Rahman Crescent Institute of Science and Technology. His research interests include drug delivery, nanotechnology, cancer biology, and the application of artificial intelligence in pharmaceutical sciences. He has authored publications in reputable international journals, contributed numerous review articles, and written several book chapters. He also serves as a reviewer for

leading international publishers, including Elsevier, Dove Medical Press, Frontiers, and Springer. He is committed to continuous learning and actively contributes to research and development in the field of pharmaceutical sciences.

Prema Suseela

Dr. S. Prema working as an Assistant Professor of Pharmaceutical Chemistry at B.S. Abdur Rahaman Crescent Institute of Science and Technology, Chennai. She has 19 years of experience in teaching. Her area of research interest is to identify new drugs for the treatment of cancer, anti-arthritis and gout. She has sound knowledge of the method development of pharmaceutical drug molecules by UV, and HPLC. She has 29 publications in various journals, 2 online books, patents, and presented research work at various conferences. She also holds a patent on a “Dental implant box” and a copyright entitled, “A Novel Therapeutic Treatment of Endocrine Tumour Using Emblica Officinalis and Kanchnaar Guggul Herbs”. Notably, she has published the Online book “BPharm I Semester Pharmaceutical Inorganic Chemistry Practical Manual”, Lambert Academic Publishing, ISBN No- 978-620-2-51425-5.

X. Fatima Grace

Dr. X. Fatima Grace is associated with DR. MGR Educational and Research Institute, in the department of Pharmaceutics, Faculty of Pharmacy, since 2023 and currently holds the position as Professor with a total teaching and research experience of 18 years. She is a proud alumnus of SRIHER, completed B. Pharmacy, M. Pharmacy in Pharmaceutics and Ph.D. in Pharmacy from the same university. She also completed a PG Diploma in Intellectual Property Rights from

Anna University. Also completed a Diploma in Educational Psychology. To her credit, she has filed two Indian patents, authored three books and 4 chapters in the field of drug delivery. She has received several best paper awards for her presentations at conferences. She had been sanctioned with two intramural research projects as Principal Investigator and one as Co-Investigator. She has been invited as a guest speaker in Kuala Lumpur, Malaysia. She serves as Editor and reviewer in various peer-reviewed journals. She is currently guiding six PhD Scholars and has guided several UG and PG students for their thesis and to present their research works in national and international conferences. Her areas of research interest include design, development and evaluation of natural Bioenhancers for enhancing bioavailability of drugs, herbal formulations and cosmetics. She has published about 56 papers in national and international peer-reviewed journals and presented papers in national and international forums.

T. Sheela Rani

Dr. T. Sheelarani, Assistant Professor in Pharmaceutical Analysis at Sri Ramachandra Institute of Higher Education and Research (SRIHER), Chennai, has over 20 years of teaching experience and holds a Ph.D. in Pharmacy (2018) from SRIHER, M.Pharm (2004), and B.Pharm (2001) from The Tamil Nadu Dr. M.G.R. Medical University. She has 15 research publications and book chapters in Recent Advancements in Management, Engineering, Arts and Science and Novel Approaches to Health with Nutraceuticals. Her research interests include isolation of compounds, method development, and validation using analytical instruments. She has received intramural summer research fellowships for projects on metal content quantification in herbal formulations (2013), HPTLC fingerprinting of Eclipta prostrata (2016), and formulation of antacid suspension (2023). She was also awarded the GATE-Young Faculty Research Grant (2013–2014) worth Rs. 80,000 for investigating cytotoxic assessment and the role of proinflammatory cytokines in Myxopyrum serratulum extracts.

Table of Contents

Chapter 1: The Need of Artificial Intelligence and Machine Learning in Designing New Cancer Drugs.....	1
Chapter 2: Application of Artificial Intelligence in Cancer Drug Design	13
Chapter 3: AI-Based Drug Delivery Models for Cancer Drugs	28
Chapter 4: Diagnostic Applications of Artificial Intelligence.....	43
Chapter 5: Intelligent Nanosensors for Biomarker Profiling.....	60
Chapter 6: Predictive Models for Metastatic Cancer	78
Chapter 7: Cancer Nanotheranostics	94
Chapter 8: AI and Nanomedicine for Tumor Microenvironment (TME) Modulation	109
Chapter 9: AI-Driven Multi-Omics Integration for Cancer Nanomedicine	124
Chapter 10: AI-Powered Wearable and Implantable Nanosensors in Cancer Care	135
Chapter 11: Integration of AI with Clinical Nanomedicine Workflows.....	150
Chapter 12: Ethics of Artificial Intelligence in Medicine	168
References	180
